TOP 5 UPDATES FOR BUSINESS CENTRAL

INTEGRATION WITH SALES

There is now shared AI between Business Central and Dynamics 365 for Sales. Other improvements include data and sales quote synchronizations.

KEYBOARD SHORTCUTS

The tremendously popular list of keyboard shortcuts already available has been expanded with many additional combinations

QUICK ENTRY

Quick Entry is a powerful and simple feature that provides an alternate path through editable fields on a page - moving the focus to the next Quick entry field and skipping over non essential fields.

LIFE CYCLE MANAGEMENT

With the update comes enhancements to how you manage your customer's Business Central tenants. Improvements include a managed upgrade scale, version previews, multiple sandboxes, and more.

DOCUMENT FOCUS MODE

This feature makes searching though longer documents easier - creating a special view and allowing for fast data entry.
